BizTech Introduces Coding Product at AHIMA Conference

BizTech Solutions Inc., a supplier of document management solutions, has released ProMed for Coding (Emergency Department) and recently showcased the product at the American Health Information Management Association (AHIMA) Convention and Expo in Denver last month.

ProMed was originally built for coding lab orders and allows coders to bring all of their work directly to them in a single environment. It integrates patient demographic information, charge data and images from different platforms.

This new process and application can save hours in the processing cycle and generate a positive cash flow position.
