In order to stay competitive, the financial community must continually update processes and procedures. Leaders in this market persistently strive to:

- Improve Operational Efficiencies
- Improve Service to Customers
- Reduce Costs
- Increase Customer Satisfaction
- Maintain Profitability
- Retain and Expand Deposits

To retain and win new customers, old methods and practices are being updated with new innovative technology-driven solutions. Paper and paper-based processing methods are being replaced. Online banking, ATM's and web-based services are now expected by customers. Microfilm, the long established standard for image storage, is being replaced by digital images and online databases accessible from anywhere in the world.

BizTech Solutions Inc., a leader in scanning and work process automation, is helping the financial community to make the technology transformations necessary to stay competitive and responsive to their customers.

How do we do it?

At BizTech, we analyze your business processes to identify bottlenecks and inefficiencies. Using process modeling tools, we map cost-effective alternative solutions for improving your cash flow, while keeping the learning curve short and maximizing user acceptance.

We determine the customization and integration requirements, and employ the appropriate ProFinancial Series tools and applications:

- Data Capture and Distribution (e-forms, fax, e-mail, scanning)
- Content Management
- Digital Signatures
- Check21 Processing Solutions (X9.37 processing)
- Merchant Capture
- Workflow Automation
- IP Phone Systems
- Unified Messaging

Why choose BizTech?

- Our clients have achieved measurable improvements in their processing cycles.
- Experienced and certified technical professionals are on staff in our Financial Practice, bringing real world focus and expertise to our solutions.
- BizTech Solutions Inc. has the resources and experience to integrate data from and with various disparate systems.
- We partner with the best hardware and software manufacturers in the industry to provide our clients with the right solutions for their environment.

ProFinancial Series

“BizTech has identified areas within financial institutions that are paper and process intensive. The ProFinancial application suite automates these processes, resulting in decreased processing times, reduced costs and improved operational efficiencies.”

- BizTech Financial Practice Manager

Merchant Capture - Distributed image capture enables electronic deposit of scanned checks from corporate accounts, creating standardization and common infrastructure across every point of presentment, including commercial and merchant locations.

Electronic Proof and Balancing - Branch or operations staff can effectively process transactions with small, low-cost capture devices and fully functional software with CAR LAR recognition capabilities. Transactions can be captured/balanced at the remote locations, or simply captured/transmitted to the operations center for reject repair and balancing. Electronic proof and balancing eliminates the need for couriers, reduces processing time and eliminates the need for costly MICR encoder/sorters with their associated high maintenance and supply costs.

Electronic Cash Letter / Check21 - Cash letters are prepared electronically either at the branch location or the central site. Using ANSI standard X9.37 files, cash letters are sent electronically to the FRB or other correspondent bank(s), eliminating courier costs and resulting in quicker funds availability.

Enterprise Content Management - Electronic data and images replace file cabinets and file rooms, reducing call backs and the need to put customers on hold while searching for information.

Workflow - Electronic forms and workflow software automates the movement of documents and/or tasks through a work process, providing a method to specify, execute, monitor and coordinate the flow of work within a distributed office environment using your existing network infrastructures.

Digital Signature - Sign & seal electronic documents with digital signatures, expediting business processes, reducing costs, increasing security and helping organizations to comply with regulations.

Core Skills & Experience

BizTech Solutions' technical staff maintains key industry certifications, such as Microsoft Solutions Developer, DBA, Applications Developer, Systems Engineer and Systems Administrator.

Our Business Analysts possess over 100 years of combined experience spanning an array of industries, government and education. They hold certifications in Business Intelligence, Document Integration Architecture, Integrated Portal Technologies, Small Business Manager Financials. They are also trained in Change Management and Business Process Discovery methodologies.

We are experts in the design, integration and support of enterprise and departmental solutions incorporating imaging, content management, compliance, ERP, and Line of Business applications.

We are a Certified Tier-1, field-managed **Microsoft Gold Partner and ISV Managed Partner**, with offices throughout the United States.

What does Microsoft Gold mean to you...

We are specifically certified by Microsoft in the following competencies: Information Worker, Custom Development, Data Management Solutions, Networking Infrastructure Solutions, Advanced Infrastructure Solutions, and Business Process & Integration Solutions. To achieve each competency, we have built, developed and supported a minimum of three successful solutions each calendar year, and our customers have provided reference verification to Microsoft.

We have earned a Business Solutions competency, specializing in SharePoint and the Microsoft Dynamics CRM product. In addition, we are a Web Application development specialist, having demonstrated excellence in developing applications that operate over the Internet, Extranets and Intranets.

- Premier partnership levels with industry leading product manufacturers such as Kofax, Open Text, Fujitsu, and Kodak, with technical certification to build and support workflow, content management, collaboration, capture, access, and storage solutions.
- Standardized life cycle development methods to help analyze, design, build, test and deploy your solution.
- Formal business process re-engineering methods to discover, define and design process solutions.
- Change management methods to support the implementation and acceptance of new systems and processes.
