

BizTech Solutions, Inc. Case Study:

Armed Services Command Electronic Imaging System

ISV/Software Solutions

The Business Challenge

The armed services command Records Center has the task of managing physical and electronic information for a period of 40 years. The task of tracking the location of any one file during the storage and access portions of its life cycle is difficult. The armed services command CRC needed to move from an antiquated system to one that meets today's and what is understood of tomorrow's specifications.

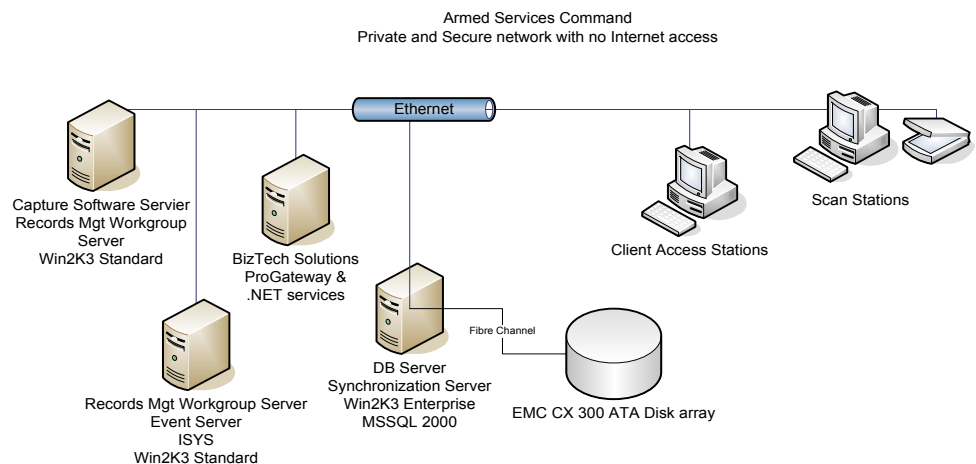

The new platform must be able to track and report the location on all forms of media related to a case in any phase of its life cycle including Paper, Tape, Magnetic, and Optical WORM.

The Results and Benefits

- Improved controls on file management, including tighter security controls
- Reduced paper handling
- Improved image quality
- Free Text searching capabilities
- Increased ability to adapt to security directives
- Added capability to work with electronic data

Technologies Used:

- Windows Server 2003
- MSSQL 2000
- Capture Software
- DoD 5015.2 Certified Records Management Software
- ISYS Search
- BizTech Solutions, Inc. ProSeries Products
